

STRAIT OF HORMUZ – COORDINATED MARITIME BLOCKADE

Agent-Based Model | FAC Swarm Denial | Queuing Theory Overlay | TAK Export

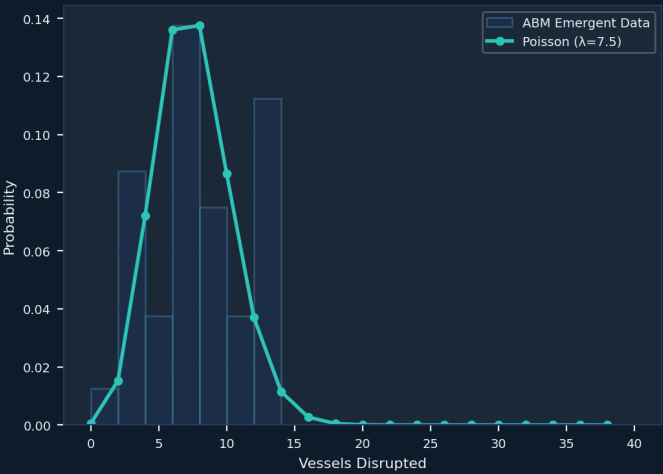

Straits of Hormuz – Agent Positions (Final State)

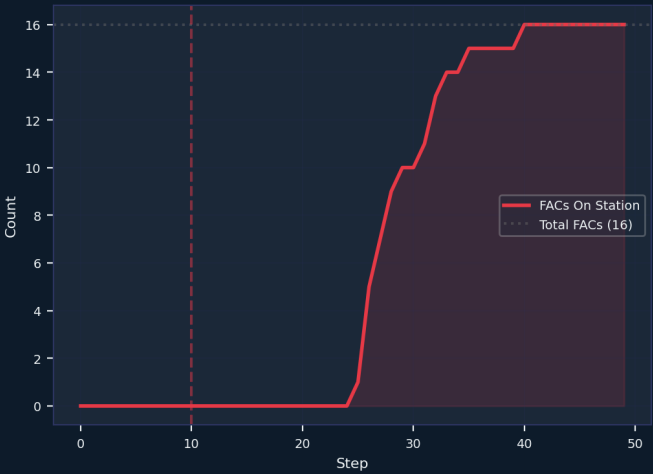

Disruption Over Time

Queuing Theory – Arrival Rate Fit

FAC Swarm Deployment

SITUATION ASSESSMENT

Vessels Blocked: 3
Vessels Queued: 10
Total Disrupted: 13 / 40
Disruption Rate: 32%
FACs On Station: 16 / 16

Poisson λ : 7.5 vessels/step
Attack Trigger: Step 10

IMPACT

~20% of global oil transits this chokepoint daily.
Full blockade = immediate global energy supply shock.
